

# Abdullah Imran

Full Stack & AI Engineer

Stoke-on-Trent, UK | 07796 581801 | abdullah.adam2002@gmail.com | abdullah.bsaph.com

---

## PROFESSIONAL SUMMARY

Full Stack & AI Engineer with 5+ years building and shipping production web applications, now focused on LLM-powered agent systems. Strong in Python and TypeScript/React, with hands-on experience integrating large language models, building agentic automation pipelines, and deploying them to isolated, multi-tenant cloud environments (Docker, Fly.io, AWS). Comfortable owning features end-to-end — data layer, REST/GraphQL APIs, UI, and CI/CD — and turning real business problems into working software.

## TECHNICAL SKILLS

**AI & LLM:** LLM agent orchestration & automation, LLM API integration (OpenAI / Anthropic), prompt engineering, Composio tool-calling, multi-tenant agent deployment

**Languages:** Python, TypeScript, JavaScript, SQL

**Backend & APIs:** Django, Node.js, REST APIs, GraphQL (Strawberry), microservices, Supabase, PostgreSQL, Stripe

**Frontend:** React.js, Next.js, React Native (Expo), Tailwind CSS, HTML5 / CSS3

**Cloud & DevOps:** Docker, AWS, Fly.io, Render, Linux, Nginx, Proxmox, Git, CI/CD

## PROFESSIONAL EXPERIENCE

**Full Stack & AI Engineer (Contract)** | Trovelogic Ltd — LoopSuite AI Oct 2025 – Present

- Built and deployed production LLM-agent automation pipelines (lead discovery → enrichment → personalised outreach) using the Composio tool-calling framework, increasing outbound capacity without added headcount.
- Deployed and operated private, per-customer AI agents in isolated Docker containers on Fly.io, supporting a multi-tenant B2B SaaS architecture.
- Implemented secure authentication, database, and backend services on Supabase; managed continuous deployment pipelines on Render.
- Self-hosted and served production landing pages on Linux / Proxmox / Nginx infrastructure feeding live ad campaigns.

**Freelance Full Stack Developer** | BSA Axiom Aug 2018 – Present

- Designed, built, and shipped 15+ production full-stack web applications for healthcare, automotive, and hospitality clients using Django, React, and PostgreSQL.
- Architected a secure pharmacy e-commerce platform with integrated consultation booking and patient-data management.
- Built and maintained resilient Linux server infrastructure (Proxmox, Nginx), achieving 99.9% uptime across all client deployments.

**IT Systems & Automation** | Loomer Medical (GP Surgery Group) Feb 2024 – Oct 2025

- Developed custom Google Workspace automation scripts that streamlined administrative workflows and cut manual effort by ~40%.
- Maintained 99.9% uptime for business-critical systems across multiple sites.

## EDUCATION

**BSc Electronics Engineering & Computer Science** | The Open University Graduated 2026

- Dissertation: a full-stack freelance-management web application (project-management platform).

**Electronics Engineering & Computer Science (Years 1–2)** | University of Edinburgh 2021 – 2023
